Summary

I am a self-driven final-year student in the field of Computer Science. My academic journey has equipped me with the invaluable ability of constructing full-stack dynamic web applications, developing Machine Learning and Deep Learning algorithms and a liking for business intelligence. I am excited about bringing my technical skills and problem-solving abilities into a professional environment and am on the lookout for an internship opportunity where I can contribute to and grow in a dynamic team.

Education

ESPRIT

Sept 2022 – Present

Engineering Degree in Computer Science

Gained expertise in programming (C++, Java, Python), software development, and algorithm design. Learned the fundamentals of computer networks, cybersecurity, and operating systems. The degree also covers web development, cloud computing, and DevOps enabling me to develop problem-solving abilities, knowledge of machine learning, AI, and software engineering principles like Agile.

IHEC Carthage

Sept 2019 – June 2022

Bachelor's Degree in Business Intelligence

Graduated with honors, acquiring a strong foundation in database management, data pre-processing and transformation using tools such as SSIS and SSAS and data visualization with tools like Power BI.

El Attarine High School Ariana

Sept 2015 – June 2019

High School Diploma in Mathematics

Graduated with honors, gaining a solid foundation in calculus and algebra, as well as introductory knowledge in computer science..

Technologies

Languages: C++, C#, Java, JavaScript, PHP, Python, R

Frameworks & Libraries: Angular, .NET, Spring Boot Flask, Symfony

Data Science & Machine Learning: TensorFlow, Keras, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

Business Intelligence (BI): SSIS, SSAS, Power BI

Database Systems: MySQL, PostgreSQL, MongoDB, SQL Server, Oracle, SQLite
